# Introduction!!

## Functionalities

## Requirements

- Recognize user voices
- System should include administrative view for editing and updating software
- Allow students to log in and interact with advising system
- Connect system to catalog/transcript of the student
- System should be able to generate multiple courses the user can pick from and the amount of courses they would need in order for the student to graduate on time.
- Student can filter the advisor system to specific:
  - Credit amounts in a given semester

*This is vague!!*

*Exactly what tasks are performed?*

*Will be able to use the system --*

*Full time/part time*

*What does this mean?*

*Time period of classes in the day*

*Preferable concentrations of what courses they want*

*System should be user friendly and easy to use*

*System can give different instructor choices*

*What does this mean?*

- Help track and predict student GPA depending on final grades, if GPA is low, advising system will notify student about possibly academic probation

*Are these supposed to be functionalities?*  
*As stated, they are not!!*
